# MILL SPINDLE

# C-AXIS DRIVE

Our Mill Spindle C-Axis Drive allows you to accurately position right-angle milling heads to nearly any angle for milling, drilling, and tapping on multiple sides of a part.

This is a FULLY programmable axis that allows simultaneous motion interpolated with the X, Y, Z, and even A axes, making it possible to reach difficult internal features, or perform simple end work on longer parts – operations not possible with traditional 3- or 4-axis set ups.

**NOTE:** Requires a side-mount tool changer. Requires a Haas mill with 4th-axis drive and NGC software version 100.21.000.1130 or later. Machines with a single-axis rotary installed will require both 4th- and 5th-axis drives. Not compatible with 2-axis rotaries.

## PRODUCT HIGHLIGHTS:

- Mill, drill, and tap on multiple sides of a part
- Fully programmable interpolated motion
- Accurate positioning to nearly any angle
- Mounts to the mill spindle

## STARTING AT:

# \$15,795
